General information

TightGate-Pro provides full encryption of the file transfer and VNC transmission (image, sound and print data) to the workstation PC. A strong encryption is used which cannot be weakened.

The CC-compliant version of the TightGate-Viewer allows in the factory setting only the use of the clipboard by individual confirmation.

For using TightGate-Pro and TightGate-Pro (CC) Version 1.4 only the client software provided by m-privacy GmbH can be used.
