TightGate-Pro: Display of TightGate connections (Max, Ø)?

If you would like to know how many TightGate connections were registered on a TightGate-Pro in a specific time period, you can do this using the following instructions.

- Please as administrator **security** or **root** (in **root maintenance console**) and open the console there.
- The command **shownrconnstats** command followed by a time specification (in seconds) displays the average and maximum number of logged-in users in this period.
- Other time intervals can also be selected. The following are available **m**=minutes, **h**=hours and **d**=days.
  Example: The command is used to display connections within the last 3 days:
  shownrconnstats 3d
- If the command is called without specifying a time, a short help is displayed.
