Customise Thunderbird using a policy (tbpolicies.json)

Policy support also works with Thunderbird. This policy can be used to centrally specify and manage many default settings for the Thunderbird mail programme. The policy can be customised using a JSON file called **tbpolicies.json** to implement the policy.

In TightGate-Pro, the administrator can use the ***config*** to import a new policy (tbpolicies.json) for Thunderbird or remove an existing policy at any time.

Hint

The following links will help you to create a Thunderbird policy:
Thunderbird Enterprise Policy Documentation Generator
Enterprise policy descriptions and templates for Thunderbird

Procedure:

- Create a Thunderbird policy (file name **tbpolicies.json**)
- Copy the created policy **tbpolicies.json** via TightGate-Schleuse, into the administrator's lock directory ***config***.
- Login as administrator ***config*** at TightGate-Pro and selecting the menu item **System Preferences > Import Thunderbird policy**
- Please select the file **tbpolicies.json** file and confirm the selection with **OK**
- Do not forget **Save** and **Apply**
- Please log in with TightGate-Viewer, open Thunderbird and check whether the desired settings have been set.
