MagicURL	yes	no

Hinweis

Zumm-privacy download section GmbH

Installation & Configuration

The installation of the individual client programmes for the various operating systems is described below.

Windows operating system
TightGate-Viewer for Microsoft Windows
Gateway programme for Microsoft Windows
"MagicURL" browser switcher for Microsoft Windows

Linux
TightGate-Viewer for Linux

General notes TightGate-Pro generally implements end-to-end encryption for both file transfers and VNC transmission (image, audio and print data) to the workstation PC. Strong encryption is used, which cannot be weakened.

The CC-compliant version of TightGate-Viewer, in its factory settings, only permits the use of the clipboard subject to individual confirmation.

Achtung

Only the client software provided by m-privacy GmbH may be used to access TightGate-Pro.
