Registration

Every workstation at which TightGate-Pro is used is prepared accordingly with the programme TightGate-Viewer. To use the additional file transfer function, the additional programme **file transfer** programme is required.

The programmes are usually installed and managed centrally by your system administration.

Prepared workstations have corresponding icons on the desktop. These icons can be used to start the programmes with a click of the mouse:

Icon	Description	
	**Internet icon**	Desktop icon for starting the Internet (TightGate-Viewer)
	**File transfer**	Desktop icon for starting the file transfer (TightGate-Schleuse)

If the specified programmes are not yet installed on your workstation PC, please contact your system administrator.
